BEER KEPT IN GOOD SHAPE—GOOD ASSORTMENT OF SOFT DRINKS.

IN line with new legislation being passed in the various States of the American Union aimed to diminish the alarming number of accidents through reckless driving of automobiles, particularly on level railroad crossings, the Board of Railway Commissioners for Canada has requested the Canadian Pacific Railway to submit information bearing upon similar dangerous practices by motorists on various portions of its system so that use may be made of the information with a view to endeavoring through education to minimize the occurrence of such dangerous practices.

In a Bulletin issued by the Board of Railway Commissioners on June 15th, 1923, 54 cases of danger at protected crossings are cited for the period October, 1922, to May, 1923, and of these fifty are declared to have been due to the carelessness of motor drivers. "Motor accidents," says the bulletin, "are becoming more frequent. Every sane motorist deplores this. If accidents are to be lessened, the sane motorist must educate the culpably negligent motorist."

All highway crossings are by law protected by signs, and they are only dangerous when the driver of the automobile makes them so. They are not dangerous if motorists will take a small part of the care they exercise in turning on a city street. It is the motorist's carelessness that makes them dangerous. The train has right of way. Everyone knows what may happen if the plainly seen warnings are disregarded at a point where the motor car can stop while the train cannot.

The surprising part of it also is that safeguards and precautions erected by the railroads are so often entirely ignored. Time after time newspaper reports show that crossing alarm bells, barrier gates and even watchmen waving "stop" signals mean nothing to the man in the

motor car who is determined to beat the train to it.

Coroners' juries are usually more discriminating and put the blame where it belongs, but the general public, seeing the usual newspaper heading, "Train Crashes into Motor Car," starts out with the impression that the train must necessarily be to blame, when, as a matter of fact, a fair statement of the case would be "Another Auto Gets in Path of Fast Train." Quite as often, too, the reading should read, "Flying Auto Dashes into Moving Train." Frequently the auto strikes the train well behind the engine, a convincing indication that the motorist too frequently treats the railroad crossing with the same casual notice that he gives the intersection of a quiet country road.

Out of 32 level crossing accidents that happened in Ontario during 1922, 22 were the result of the motorist not heeding the stop signal and even were the result of running into the lowered gates or actually passing under them after they were lowered or while they were being lowered. One man had no headlights and apparently did not see the gates were down while the remainder in other ways tried to cross in front of the engine in order to save time.

In an editorial on this question, the Toronto Star says that: "In a country like this, with its magnificent distances, and railway systems with twenty thousand miles of track, the time may never come when all level crossings will be eliminated. With motor cars in use everywhere there is no railway crossing so remote but that a motorist may use it. It is his business to see that he does so at a safe moment. It is his business for two reasons: (1) because it is the presence of him and his car at that time and place, and not the coming of the train, which creates the risk of a crash; and (2) because if there should be a crash he and his car will be crushed, and not the train."

LOCAL NEWS.

Monday next, November 12, is Thanksgiving Day, and the places of business in Stony Plain will be closed.

In Stony Plain, on Nov. 1, to the wife of Mr. W. Bishop, a boy.

In Stony Plain, on Nov. 1, to the wife of Mr. H. Oppert, a daughter.

Mr. Gates was taken to the Royal Alexandra Hospital on Saturday, for treatment.

Young Mr. Allen, a former resident of Stony, was down from Sanguis this week.

Officer Cavenagh now has an automobile.

Inc. Councillors meet in Stony Plain tomorrow, at the Royal Hotel.

Mr. Luke Schrumm is planning to move back to his farm near town.

Messrs M and J McGillivray, from Guelph, Ontario, are here, looking for location in this district.

Ald. East of Edmonton delivered an address in the Town Hall Saturday evening under the auspices of the Prohibitionists.

Mr. Sam Zucht, the expert mechanic, has resumed his duties at the Stony Plain Garage.

The Town Council meets Monday evening in the Town Hall.

Mr. Mike Ducholke, Stony's enterprising implement agent, has rented his farm to George Schadeck for five years.

Grain hauling is now the popular outdoor pastime.

Wood & Zucht shipped two cars of cattle and one car of hogs to Edmonton last week.

In spite of the good local attraction that evening, two carloads of pleasure seekers motored to the City Friday evening, to attend a big dance being held there.

A crowd which taxed the capacity of the place attended the big Halloween party in Ducholke's Hall last Friday night.

The evening was spent in singing popular songs, playing games and sports of all kinds, and much merriment was caused on visits being made to the side shows.

Stony Plain W. L.

The November meeting of the local W. L. will be held in Ducholke's Hall Wed. Evg. Nov. 14, at 8 p.m. and will be an open meeting.

A short sketch of the life and works of Rudyard Kipling and Mark Twain with recitations from both.

A hearty welcome is extended to all.

A Thanksgiving Day Review

Five years have elapsed since the signing of the Armistice brought an end to actual hostilities in the Great War, and a backward glance over this momentous half of a decade discloses that, while the high hopes then entertained for the immediate future of the world have been far from realized, substantial progress has been made in the direction of reclaiming civilization from the devastation and almost ruin to the verge of which it was brought by the great world upheaval of 1914-1918.

Germany, it is true, is in a condition of disorganization perilously close to a state of chaos, but latest reports seem to indicate the failure of the attempts made to break up the German republic into a group of separate states. German money is worthless and German credit gone. Ten years ago one of the great powers of the world, highly organized and prosperous, Germany today is impotent. Such is the price she is paying for her flag and the attempt to enslave mankind by world domination.

Russia is recovering to some extent, disorder and bloodshed are disappearing and real efforts at permanent reconstruction are in evidence now that the Soviet leaders have abandoned as hopeless their visionary plans of extreme communism.

Austria, through the efforts of the League of Nations, is re-establishing herself and in the past two years has experienced a wonderful recovery. With the war lords out of the way, and with the people anxiously striving to develop their country in the arts of peaceful industry, the future of Austria is bright with promise.

During the year which threatened between Italy and Greece, and might easily have developed into another world conflagration, was happily averted, and while at first the indications were that the League of Nations had lost prestige through its handling of this crisis, the final outcome has been to strengthen world opinion that the League is an important and really vital factor in controlling and directing international relations in the world today.

Ireland has passed through its reign of terrorism, and the Free State Government has received the strong approval and support of the Irish people in a general election. Today the Irish Free State occupies its proper place among the sister nations of the great British commonwealth of nations and has been admitted a member of the League of Nations. Its representatives are engaged in common with those from the Mother Country and overseas Dominions in working out the problems common to all and in the solution of which benefit will be derived by all.

Whatever may be the future of the League of Nations, it is abundantly clear that the British League of Nations, as represented by the Imperial Conference now sitting in London, is one of the greatest factors making for world betterment and human progress and happiness. United in time of war, the Empire is giving the world the inspiring example of a group of self-governing nations just as closely united in the development of the arts of peace and good government.

Another attempt to solve the reparations and economic problems between Germany and the Allies is to be made at the instigation of the British Government, and with the United States participating. France has only agreed with implicit reservations which rob the approaching conference of much that was expected of it. Nevertheless, the hope is entertained that as a result of its deliberations very real progress towards a solution of these vexatious questions will be made.

Economic conditions in Canada have steadily improved during the past year. Immigration has more than doubled, and unemployment reduced almost to the vanishing point. The trade of the Dominion has largely increased, and the country as a whole has been favored with a satisfactory harvest in point of volume of grain and other products, although some sections have suffered heavily through rust and other pests and climatic conditions. The outlook generally is much improved.

This betterment is also reflected in a subsidence of that unrest which in its sweep throughout the world did not leave Canada unaffected and which found open expression in elections in an apparent determination on the part of the people to reject existing conditions. Recent by-elections in four out of the nine Provinces have resulted in the return of supporters of the existing Governments, quite apart from their political complexion, thereby revealing a changed attitude on the part of the voters, and an indication that the people are beginning to realize that men entrusted with the responsibilities of office in Canada are doing their best under trying and difficult circumstances.

While Canada still has a long way to go to reach pre-war conditions, and largely so because of its heavy war debt, the people of the Dominion on this Armistice anniversary and Thanksgiving Day have substantial reasons for thankfulness that their lot is cast in Canada.

 Donna: "I certainly don't. The first time I saw Jack Morton was in a swell Hosiery and I fell desperately in love with him. I found out later he had only liked the car."

The Wainwright Buffalo

Herd Increases Rapidly Under Government Protection and Numbered Over 8,000 Animals this Fall

Bison Americanus was due for a surprise this fall. After roaming the plains in the district of Wainwright, Alberta, within the confines of a high, strongly constructed fence, where he reined as monarch of all he surveyed with little interference from human beings, Bison Americanus has become again an article of commerce. The reason was that there were too many of him and even a beneficent government cannot sustain more buffalo than it has fond for.

At Wainwright on the Canadian National Railway east of Edmonton, the government buffalo park has been the mecca of many sportsmen who have stopped off between trains to go out and look over the largest remaining buffalo herd. The visitors generally saw only an exhibition herd, but roaming about in an enclosure over one hundred square miles in extent was a far greater herd which was unapproachable by any but the herders themselves. For from 716 head of animals, the initial purchase of the Canadian Government in 1907, the herd has increased until this year there were 8,300 of the animals; too many to be winnowed, and it was decided to kill off 3,000 head.

The meat, hides and heads are all to be marketed and thus buffalo steaks and tongues will again be among the delicacies offered to Canadians and Americans this fall.

"There is a tide in the affairs of men," This Shakespearean adage may be applied to countries and animals as well as to individuals. In proof of this assertion there can be cited the case of the Bison Americanus or, as it is commonly called, the buffalo. The story of how this king of North American history was saved from extinction by timely action on the part of the Canadian government forms an interesting paragraph in Canadian history.

"Why did you leave your last place," asked the lady of the world-be come. "I just could not stand the way the master and the Mrs. used to quarrel. It was all the time. When it was not me and him it was me and her."

CAUSE OF BACKACHES

Every muscle in the body needs a supply of rich, red blood in proportion to the work it does. The muscles of the back are under a heavy strain and have but little rest. When the blood is thin they lack nourishment and rebel. The result is a sensation of pain in these muscles.

Many people are frightened into believing that backaches are due to kidney trouble, but the best medical authorities agree that backache is very seldom due to kidney trouble. In fact not more than one backache in a hundred has anything to do with the kidneys. The whole trouble is due to thin or impure blood, and those who are troubled with pains in the back or joints, either frequent or occasional, should look to the condition of the blood. It will be found in most cases that Dr. Williams' Pink Pills by building up the blood and feeding the starved nerves and muscles will banish the pains and make you feel better in every other way. How much better it is to try Dr. Williams' Pink Pills for your blood than to give way to unreasonable alarm about your kidneys. If you really suspect your kidneys any doctor can make a test in ten minutes, that will set your fears at rest, or tell you the worst.

All dealers in medicine sell Dr. Williams' Pink Pills, or you can get them by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

French Prince Must Pay

Landlady Gets Ejection Order for Non-Payment of Rent

After protracted litigation, Prince Blle of Bourbon de Parme's Paris landlady Mme. Robert, has obtained an ejection order against His Highness for non-payment of rent for his apartment in the Avenue Bos de Boulogne. The court has also ordered an inventory of the valuable furniture and art objects in the house preparatory to selling them to satisfy the debt.

Are Important Events Pending?

Year's Figures Totalling Fifteen Have Shown Interesting Happenings

To those who believe in signs and portents, the sum of this year's figures, 1923-15, may afford some importance, both at home and abroad, are pending. The last time the total of the year's figures amounted to fifteen was eight years ago, and none of us are likely to forget 1914. The year 1906 also saw happenings of world-wide interest, including payment by Russia to England of an indemnity for the North Sea "incident." In 1896 both Pitt and Fox died; 1815 saw Waterloo; in 1824 Byron died; and in 1851 the Great Exhibition was held. What, we wonder, will be the outstanding feature of 1923?—Montreal Gazette.

Use Marks For Wallpaper

German Police Confiscate Tons of Paper Currency at Dutch Frontier

Nearly three tons of paper marks have been confiscated at the Dutch frontier by German officials. The currency belonged to dealers who have been doing a big trade in exporting notes to Holland for advertising purposes. The Dutch tradesmen pay them in bulk to use as wallpaper and also for insertion in cigarette packages, thus enabling the dealers to attract sales by advertising this package contains a one-million mark note. Such a practice has been in use for a long time and the police are now trying to stop it.

Joint Soreness Subdued, Swellings Quickly Reduced

Wonderful Results From Rubbing The Sore Parts With

NERVILINE

"My testimony should convince anyone that Nerviline is a splendid preparation to use on swellings, rheumatism, neuralgia, etc.," writes Anna F. Fleury, from Kingston. "I went to McKays' drug store and they recommended Nerviline, which restored me completely." "For Rheumatism, Lumbago, Sciatica, you will get lasting satisfaction from a 50c bottle of Nerviline. Sold every where."

Did Not Work For Money

Electrical Wizard of Schenectady Could Have Made Millions, But Devoted His Life to Service

It was learned that the late Dr. Charles Steinmetz, who died at Schenectady, N.Y., recently, left an estate consisting of only a 1912 electric automobile and a \$150 insurance policy, the same as issued to all veteran employees of General Electric Company. The wizard who controlled electrical storms, probably could have made millions but apparently he drew no more salary from the company than sufficient for the necessities of life. "I do not wish to work for money," Dr. Steinmetz once told his employer. "Let me draw it as I wish and I draw too much to tell me. If I think of money I will not work as well. Build me a house and laboratory. That is all I want."

Mothers can easily know when their children are troubled with worms, and they lose no time in applying a reliable remedy—Mother Gray's Worm Exterminator.

It might be remembered that churches, on Sunday, never get too close to the edge of the road and turn over into a ditch.

Praise For Lloyd George

President Coolidge Pays Tribute to Efforts of Little Welshman

The visit of Mr. Lloyd George to the United States has been "a piece of good fortune for both his country and our own, and for the cause of international accord," President Coolidge said in a letter read at a dinner given by overseas writers to the former British premier.

President Coolidge wrote: "It has been a fine thing for our people to become better acquainted with this eminent leader in civilization's struggle to maintain itself and I hope he will find, when he leaves us a few days hence, that his effort in bringing his message to us has not been entirely a vain one."

Is Your Nose Stuffed With Cold?

Don't load your stomach with cough medicine. Send healing medication through the nostrils—send it into the passages that are inflamed with Catarrh. It's easy to get rid of a bad cold, to drive out Catarrh, to strengthen your throat by inhaling Catarrhine. Get Catarrhine from your druggist today. By using it frequently you keep the air passages free from germs, and thereby prevent many a bad cold. Two months' treatment \$1.00; small size 50c. Refuse a substitute. By mail from The Catarrhine Co., Montreal.

Canadian Bacon Wins

Canadian bacon won first prize at the National Farmers' Dairy Show in London, Eng. In the class for colonial bacon, where all the dominions were represented by exhibits, the Canadian bacon won, first prize going to Gunns Ltd., Toronto.

Province Of Alberta Grows Phenomenal Grain Crop That Excels All Previous Records

In a year that has been outstanding from an agricultural point of view, in that the Dominion with a smaller sown acreage than that of the previous year has produced a uniformly greater crop than even the record of 1922, the most signal and noteworthy feature would seem to be the phenomenal grain production of the province of Alberta. This province, which stakes its hopes of prosperity rather in diversified farming than in grain growing, has achieved feats in grain production that will doubtless be set down for all time in the cereal production history of the American continent.

There is no doubt but that this year in all respects Alberta has achieved not only a record yield for the province but a remarkable one in agricultural annals, this not alone in the aggregate crop but in the acreage average and general uniformity. Wheat weighing over 60 pounds to the bushel has been reported from all parts of the province, whilst there are frequent occurrences of oats weighing more than 40 pounds to the bushel and barley 50 pounds to the bushel. The following cases, taken from different sections of Alberta, will give some indication of the phenomenal yield.

At Lacombe, a wheat yield of 63 bushels to the acre is recorded, grain weighing 64 pounds to the bushel and grading number one northern.

At High River, 500 acres of wheat yielded 55 bushels to the acre, weighing 66 pounds to the bushel and graded number one northern.

At Nanton, a yield of 40 bushels of wheat to the acre is recorded, grain weighing 65 pounds to the bushel and grading number one northern.

At Claresholm, a field of 80 acres yielded 37 bushels to the acre, weighing 64 pounds to the bushel and graded number one northern.

At Vulcan, over the entire district, the average wheat yield runs from 35 to 51 bushels to the acre, weighs on the average 62 pounds and grades number one northern.

In the Brant district there is a farm of 1,500 acres which has not been threshed, on which the wheat is expected to yield 60 bushels to the acre and the oats from 125 to 130 bushels to the acre.

Most extraordinary yields of grain are reported from the Provincial School of Agriculture at Olds, Alberta. On a one-acre patch, 195 bushels of Marquis wheat were threshed, which is believed to be a record for this crop exceeding the 52-bushel yield of Seager Wheeler, which was previously considered as being unassailable. From an acre sown to oats, 295 bushels were threshed. Barley similarly yielded exceptionally. On a field of 27 acres an average of 70 bushels to the acre was secured, whilst on another, 10 acres of a different variety, a yield of 80 bushels to the acre was recorded.

The record crop has taxed almost to capacity the rolling stock of the transportation companies which were preparing early in the season for its movement. The Canadian Pacific Railway placed a large number of new locomotives in the grain belt, and for several months, at the Angus shops alone, turned out twenty-one new freight cars daily. These new cars were worked West on completion and became units in trains which for length and tonnage were greater than the west had known before. On October 5th the world's record for grain trains was shattered by the Canadian Pacific with a monster of 135 cars loaded with wheat, over a mile long, which operated between Stoughton and Arcola. The contents of the cars, 185,000 bushels, weighed 5,546 tons.

All grain loading records in Alberta were completely smashed by the Canadian Pacific on October 10th when the Company loaded 753 cars, representing at least 1,065,300 bushels. If these cars were placed together they would make up a freight train about six miles in length, and a baker's dozen of these trains would extend from Calgary to Banff, a distance of 82 miles.

Send Canadian Apples As Christmas Presents

Canadian National Express Affords Special Facilities For Delivering Fruit on Other Side of Atlantic

Canada's world-famous apples are becoming more and more popular as Christmas presents for friends and relatives of Canadian residents abroad, and special attention to this traffic is being given by the Canadian National Express Company.

Mr. Fred C. Salter, Manager of the Foreign Department, Canadian National Express, has issued a circular to Canadian National Express agents throughout the Dominion relative to the sending of Christmas and New Year packages abroad. In the circular, Mr. Salter draws attention to the old-time custom of people in all walks of life sending gifts to their relatives and friends at this season of the year and requesting agents of special attention to this traffic by putting before the people the special facilities afforded by the Foreign Department of the Canadian National Express.

During recent years it has been the custom of large numbers of people throughout Canada to send a case of Canadian apples to their people at home as a Christmas present. By this means, Canada has been receiving good advertising and her fruit has become world-famous.

To encourage this form of gift-giving the Canadian National Express has instituted a special rate of three dollars per box of apples, same measuring one cubic foot eight inches and weighing 50 pounds, to all points in Great Britain and Ireland. This rate holds good from the ports of Montreal, Quebec, St. John and Halifax and includes delivery charges on the other side of the Atlantic. Shipments of this nature should be carefully packed.

All Christmas packages sent in care of the Canadian National Express are insurable to the consignee's address by means of a special through insurance policy.

Yes, indeed

Teacher—What does the busy bee teach us, Charlie?

Charles—Not to go too near the hive.

Early Seeding Best

Increased Yields On Land Planted Early in the Spring

A very important factor, says the Dominion Field Husbandman in his annual report, in increasing the yield of crops is early seeding. With no additional labor or seed, the yield on land planted early the spring is very much larger than on land seeded later. It is obvious, he adds, that this increased yield is reflected in larger returns and greater profits. A table in the report recording six sowings shows 53.3 bushels of oats, 38.4 bushels of barley, 17.9 bushels of spring wheat, and 30.4 bushels of peas per acre, for the first sowing, and 29.5 bushels of oats, 44.2 bushels of barley, 20.5 bushels of spring wheat, and 23.9 bushels of peas for the second sowing, seven days later. The reduction for each sowing made later is gradual but very decisive. Commenting on this fact Mr. E. S. Hopkins, the Field Husbandman, points out that while the second date of seeding at Ottawa gave the highest yield in every instance, it must be remembered that this land was drained, and, perhaps, with many farmers, especially in fields containing wet patches or water courses, their first seeding would more nearly correspond as to date with the second seeding at the Central Experimental Station. As the land and the seed were uniform, the decrease in yield is regarded as due solely to the late seeding.

Women Inventors Are Busy

American Women Granted Five Thousand Patents in Ten Years

To learn just what part women were taking in inventions, government officials recently undertook a survey that showed over 5,000 patents had been granted to them in 10 years, more than the total for 105 years previous. The first patent granted an American woman was given by the British Government to the wife of a Pennsylvania planter, for a device to clean and cure corn. Labor-saving machines are said to make up the majority of women's inventions, one making an apparatus for scattering fertilizer, another an article to help sugar cane, while an adjustable horse collar was made by a Montana woman. For the kitchen, a plan was brought out that prevented oil from overflowing the rim, and a wooden mixing bowl was invented that would not split. Almost every line of business was included, but 1,355 patents were for articles of housekeeping—Popular Mechanics.

When money talks the majority of us hear only the echo.

An Economical Way For The Farmer To Make A Start Towards Forming Dairy Herd

Livestock Market

Falling Off of Receipts of Hogs, Calves and Lambs

Cattle received at the public stock yards up to the end of August totaled 457,524 head compared with 436,675 in the corresponding period last year. Receipts of hogs totaled 637,692 head compared with 477,166 head last year. Calves totaled 162,514 compared with 172,025 last year, a decrease of upwards of ten thousand. Receipts of sheep and lambs during the eight months were upwards of sixty thousand less than last year, the total being 159,272 compared with 229,846. Commenting upon the latter fact the monthly review of the Dominion Livestock Branch says, "This falling off is worthy of serious consideration, being common to all provinces and not justified by conditions in any. During 1922 the sheep market was the strongest trade in the market, and under much heavier supplies than now." Prices responded to this state of things, for while cattle were at a little up compared with last year, good steers averaging at Toronto \$4.90 compared with \$4.87 per hundred in 1922, hogs were off rather more than two dollars per hundred. On the other hand calves were up nearly ninety cents, the average for veal calves being \$10.04 compared with \$9.17 last year, and good lambs selling at \$11.75 this year against \$9.06 last year, and light sheep at \$5.66 compared with \$4.98.

Drought In South Africa

Fountains Go Dry and Famine Threatens Hundreds of Cattle

The Daily Telegraph's Vryheid (Natal) correspondent says South Africa is in the grip of a most disastrous drought. From all parts of the country come stories of hardships and loss.

The northern part of the Orange Free State has been swept by a series of intensely hot and scorching winds, causing fountains to dry up, while the hatching of locusts is on an unprecedented scale. At Bloemfontein, despite its unlimited water supply, it is hard to keep flowers and trees alive. Unless rain falls soon no cattle will be left alive in the affected sections. It is predicted.

ALBERTA CROP EXCELS ALL PREVIOUS RECORDS

1. Threshing phenomenal crop. 2. A battery of reapers on an Alberta farm. 3. Horsemen alone did not suffice to gather the grain. Tractors have found great favor with the people.

(By W. W. Fraser, Livestock Commission, Manitoba Department of Agriculture, Winnipeg)

Rather than buy expensive cows, ready to freshen, farmers should consider the advantages of buying heifers approaching their first calving.

At present a cow ready to freshen will cost from \$75.00 to \$100.00, while a heifer that does not carry sufficient flesh to fatten the butcher can be bought in the Winnipeg Stockyards at 2 1/2 cents per pound; weighing 700 to 800 pounds, she costs \$18.00 to \$20.00. Frequently, it occurs that the beginner has \$18.00 or \$20.00 with which to buy a cow, but has not \$75.00 or \$100.00.

It is true that during the first year the heifer will not give as much milk as a cow; but she should not be expected to do so, as she involves but one-quarter the investment. On the other hand, the cow is just as liable as the heifer to develop a bad quarter or any other trouble; and, besides this, she may prove a short date milker, and, therefore, be unprofitable. This can be avoided in the heifer, providing the owner takes proper care of her and continues to milk her for a long term at her first lactation period. Some of the dangers in buying cows are: The cow that aborted; the frequent breeder; the short date milker; the hard milker; and the poor producer.

Good cows can be bought; but do not forget that there are fifty or more common cows for every good cow. A good dairymaid does not sell his good cows.

The purchase of heifers means "growing into" the ownership of a herd of cows rather than "going into" such ownership, and I believe that this is the only safe way. When this is done, increased knowledge of the work is acquired at a minimum cost, and success is much more certain. In many cases, it would have been better if people had not been able to borrow money to buy the expensive animals. From now on, the heifers referred to, take good care of them, and they will make money for you. They will sell at a good profit when ready to freshen. Cows are absolutely necessary to the welfare of every farm home. Now is the opportunity to secure some of these heifers; and they will develop into a nice herd at a price within the reach of every farmer. In building up a herd, aim at one type.

Where twenty or more breeding heifers are purchased at the Winnipeg Stockyards, free transportation is granted from the yards to the railway station of the purchaser. The railway fare and necessary hotel expenses of the man coming to the yards to purchase them are paid by the Federal Department of Agriculture. Where one person wants only a few animals, we suggest that two or more neighbors join and make up a carload of twenty or more animals, and they will have the aforementioned privileges. This should be a great incentive to those wanting to procure animals of this character. The same arrangements apply to the establishing of a herd of beef cattle or a flock of sheep.

Lifeboat Is Speedy

"Wooden Whale" Attains Speed of 60 Miles an Hour

Many interesting inventions are on view at Olympia, where the Shipping, Engineering and Machinery Exhibition is being held.

A machine is shown for developing and fixing photographs automatically at the rate of 1,600 an hour. Another part of the exhibition is devoted to motor boats. In order to illustrate the progress that has been made, Messrs. Thornycroft exhibit a steam launch which has been in the water since 1872.

One exhibit is a boat which has been christened the "wood whale." It can be used as a racing craft or a lifeboat; in the latter capacity it is claimed for it that it can be dropped overboard in the roughest sea and right itself. Its speed is anything up to 60 miles an hour.

The pouch of a pelican is large enough to contain seven quarts of water.

Easier For a Camel.

And it came to pass after he
had advertised his goo's there
came unto him great multitudes
from all the regions round about
him.

And when his competitors saw
it they marvelled greatly among
hemselves saying: How is it that
this man is busy while we have
to loaf about our doors?

And he spake unto them saying:
Verily, verily I say unto you, in
this fast age of push and rustle it
is easier for a camel to pass thru
the needle's eye than a business
man to flourish without without
advertising.—Selah.

Playing The Game

In a certain New England vill-
age where the Sunday church at-
tendance was small lived a young
widow who had taken quite a
fancy to the minister. She could
see that he also cared for her, but
was evidently too shy to say any-
thing. One Sunday evening the
congregation was smaller than usual.
After services the clergyman said
to the widow: "Did you like my
sermon?"

"It was beautiful," she replied.
"I wish more people would
come," he said.

She saw her chance. "So do I."

also answered. "Why, tonight, every
time you said 'dearly beloved,'
I—I positively blushed."

CO-OPERATIVE MARKETING

THROUGH A co-operative arrangement
with the E. H. Heath Co. Limited, pub-
lishers of the Canadian Power Farmer,
we are enabled to offer that farm magazine
and this weekly for one whole year for the
price of this weekly alone. This applies to
either new or renewal subscribers.

The editorial programme of the Canadian Power
farmer for 1924 includes:

1. a series of articles on the new and its various uses
2. tree planting and windbreaks or how to multiply the farm and increase its value
3. what is the cost of raising a number of wheat—so called actual farmers
4. in the raising a necessary part of a farmer's income comes from experience that answers the question
5. to improve the marketing can it be successfully applied in a grain raising country
6. suggestions ideas for the betterment of farming conditions in Western Canada
7. how to improve the general condition in raising the farmer's land and various matters to add to make the farmer's life more comfortable.

In addition to the above, each issue will contain
five, seasonable, general articles, short stories,
household and boys' and girls departments etc.

As this is a special offer, we would advise that you
take advantage of it as soon as possible.

Send all subscriptions to this paper

HIS MAJESTY'S MAILS ON CANADIAN PACIFIC

1.—A comfortable corner of the Baggage Car.
2.—Another view of the Baggage Car.

3.—Interior of one of the new Canadian Pacific Mail and Baggage Cars.
4.—This is where the mails are sorted.

Almost every day we rely upon His Majesty's Postal service for the
delivery at certain hours of letters and parcels which are of value
and which would lose their value were they delivered tardily. Seldom
have we cause to complain of the service rendered in exchange for our few
cents and we have come to expect the efficient regularity of that service
regardless of the natural or economic disturbances which affect other
services. The letter was stamped and placed in the postal box. It must be
delivered, and with dispatch, rain or shine.

Due to the increasing use of His Majesty's Mails, the Canadian Pacific
Railway has found it necessary to add to its rolling stock, twelve new Mail
and Baggage coaches. These, being up-to-date in every respect, provide
the clerks with the handling of the mail, and a number of conveniences for
the clerks which the older type of cars could not boast of. The "All Steel"
cars are some of the finest used by Postal authorities in the world, and the
Company is to be congratulated, in that providing every facility for the
quick handling of postal matter, it has kept an eye to the comfort of the
clerks.

The forward end of the travelling Post Office, for such it is, is used
mainly for storage purposes. On one side, movable iron stanchions separate
the bags destined for the various towns en route, and on the other is the gas
stove, for cooking purposes, ice water tank, lavatory, wash basin, and
clothes cupboard—inventions which are greatly commended by the clerks.

The rear end of the mail compartment is the business end. A long
reversible table, running lengthwise, allows the clerk to face either side of
the car in order to sort his parcels into the bags which are supported by
folding racks, and into the boxes conveniently arranged above the bags for
the accommodation of newspapers, and which can be quickly emptied by
the simple expedient of raising the front. At the rear end is a table, the full

width of the car, and behind this are the hundreds of pigeon holes into which
the clerk must distribute the letters for the various towns, quickly, almost
automatically. At his feet as he stands at his table, the clerk has a tray into
which the letters posted when the train is at a station, drop. These letters he
stamps and distributes with those put on the train at the terminal. Cord with
the bundles contain registered mail they are placed into the pigeon holes
at one side, over which a wire grating is fitted and locked. Everything is
scrupulously clean.

The baggage and express end of the coaches is also the last word in car
construction. As with the mail section, the doors open in the centre of the
compartment, one half of which has a solid floor, the other half being fitted
with fish racks. In addition to the conveniences afforded the mail clerks,
the baggage men have a folding table which fits tightly against the wall
when not in use, and which may be utilized as a dining table and—but not
there is too much business to talk of cards.

The twelve new cars were designed by C. H. Temple, Chief of Motive
Power and Rolling Stock, Canadian Pacific Railway, and were constructed
by the Canada Car and Foundry Company, Ltd., Montreal. They are
designed to carry 80 tons of express matter and 10 tons of mail, a total of
40 tons compared with 30 tons, the capacity of the old type of coach. The
Company has adhered to the six wheel truck, but heavier journals have
been provided, 6 1/2 by 10 in place of the 6 by 8 inches. Another feature
of the new coaches is the diaphragm ends. This eliminates the danger of
people "riding blind".

Until now are constructed, the new coaches will operate between
Montreal and Toronto, Montreal and Saint Ste. Marie, Toronto and St.
John, N.B., and Winnipeg, and Edmonton on Canadian Pacific lines.

ROYAL YEAST CAKES

Good home-made bread is the finest food on earth—the one food that everybody eats—that everybody likes—and that agrees with everybody.

Why Earthquakes Occur

Fracture of Crust of Earth Causes Stand Strain

The usual cause of earthquake is dislocation of the crust of the earth along fractured lines. There is a fracture line along the coast of Japan and another along the coast of California. The crust of the earth is constantly in motion, up or down, sideways, or twisting. Millions of years may pass before bringing a strain so severe that the strata will slip or crumble along any great fault in the earth's crust, but when that slip comes there is an earthquake. Usually it is only a fraction of an inch, but at most a few inches. In Sakhalin, Southern Siberia, a slip of forty feet was once recorded, and the quake was felt all over the world.

GUARD THE BABY AGAINST COLDS

To guard the baby against colds nothing can equal Baby's Own Tablets. The Tablets are a mild laxative that will keep the little one's stomach and bowels working regularly. It is a recognized fact that where the stomach and bowels are in good order that colds will not exist; that the health of the little one will be good and that he will thrive and be happy and contented. The Tablets are sold by medicine dealers or by mail at 35 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Should Stay Together

If the English-speaking peoples "stand together, march together, and, if necessary, fight together, peace is secure and civilization cannot fail," said Mr. Justice Riddell, of the Supreme Court of Ontario in an address at Boston at a meeting in celebration of the fifteenth anniversary of Boston University.

Corns cripple the feet and make walking a torture, yet sure relief is in the shape of Holloway's Corn Remedy within reach of all.

When the old lady saw the magazine cover a newspaper with a heavy fan and cloth and read print through it, she rose in her seat and said, "I'm going home, this ain't no place for a lady in a thin calico dress."

Diversified Farming

What Has Been Accomplished in North Dakota Within Recent Years

According to an article by Sidney W. Hooper appearing in the Fargo Daily Tribune, diversified farming has been making rapid strides in North Dakota within recent years. The estimated value of the 1923 wheat crop for North Dakota has been placed at \$52,000,000, and the estimated value of animal products used on farms and sold during the year is \$52,675,885. These figures indicate that the value of livestock products during the year will slightly exceed the total value of the wheat crop.

How long will it be before the wheat farmers of the prairie provinces of Western Canada awake to the necessity of changing their methods? The uncertainty of the single crop method of farming has been proven over and over again by the individual experiences of farmers who have suffered from hail, drought, frost, grasshoppers and the many other evils that beset the wheat grower. What North Dakota has been able to do, Manitoba, Saskatchewan and Alberta can do, and probably do a little easier. Mixed farming is the hope of the ultimate prosperity of the west, and the sooner the change is brought about the better it will be for the future of farming on these prairies.

Keep on just as long as you can—then keep on a little longer. Persistence wins.

Mother! Give Sick Baby

"California Fig Syrup"

Harmless Laxative to Clean Liver and Bowels of Baby or Child

Even constipated babies, bilious, feverish, or sick, colicky babies and children love to take genuine "California Fig Syrup." No other laxative regulates the tender little bowels so nicely. It sweetens the stomach and starts the liver and bowels acting without grating. Contains no narcotics or soothing drugs. Safe "California" for your druggist and avoid counterfeits. "Infant's Own Genuine" "California Fig Syrup" which contains directions.

Bumps Explain Nothing

Judging character by bumps on the head or facial features is a delusion, according to the psychological department of the Northwestern University. "An individual's anatomy is not an index to his character," state the professors. The man with a square jaw may be as pugnacious as a rabbit and a woman with a bump of caution as big as an egg—Vancouver Province.

A Severe Attack Of Heart Trouble Was Relieved By MILBURN'S Heart and Nerve Pills

Mr. A. E. Barnes, Athens, Ont., writes: "Four years ago I had a very severe attack of heart trouble. I consulted my doctor; he treated me for some time, but I only seemed to be getting worse. I finally went to our druggist and purchased three boxes of Milburn's Heart and Nerve Pills and derived immediate relief from their use, and I can truthfully say they are a wonderful medicine. I always keep a box on hand, and if I feel out of sort I take a few pills and feel all right again."

Milburn's Heart and Nerve Pills are sold at all dealers, or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

The Easiest One

"Pa, do I have to learn music?" "Yes, I insist upon it. But you may choose which instrument you will study."

"Then," said Johnny, "I'll choose the phonograph."

Minard's Liniment for Dandruff

Piazza Perillage

Sie (at resort): "How the kids come in with his long green roll." He: "I suppose it realizes that there's no use coming here without one."

Minard's Liniment for Dandruff

WORLD HAPPENINGS BRIEFLY TOLD

Dr. Freeman Stocker, reputed to be one of the seven greatest mathematicians in the world, died in a Baltimore hospital Oct. 30.

Installation of long distance telephone service throughout Mexico is the purpose of a company recently formed in the City of Mexico.

All countries which did not sign the Washington naval treaty have been invited to a meeting under the auspices of the League of Nations to be held January 21.

Dawson has been in direct radio communication with High River, Alberta. It is about 1,400 miles distant. The new government radio stations at Dawson and Mayo both are working well.

At St. John, N.B., several thousand people witnessed the formal opening by Governor-General Byng of the world's largest drydock, the property of the St. John Drydock and Shipbuilding Company.

A wonderful Roman catacomb, correct to the minutest detail, has been found in a corner of the grounds of a Cromwellian house near High Beach, in the heart of Epping Forest, England.

Four children to the number of 369 have reached Rio de Janeiro from the Ruhr. They will be cared for in institutions and private families, the idea being to give them, for a few months, free of charge, good food and plenty of life.

One of the old boys of the Church of England Waiwiti Strays Society in London has been thanked and decorated by the Chinese Government for his part in saving the lives of 317 native soldiers.

The commune of Prodappio, where Premier Mussolini was born, recently acquired the house of his birthplace and gave it to him. He was present at the ceremony and the people acclaimed him deliriously.

While listening in recently at Cokestown, County Tyrone to wireless news from London, relatives of Colonel William Magill Kennedy, who held an Indian appointment, first heard of his daughter on a train near Calcutta.

If Tormented With Corns Use Good Old "Putnam's"

It's really a simple thing to remove your corns, and without pain. If you apply Putnam's Painless Corn Extractor. It acts like magic, lifts out the corn, root and branch, leaves the skin smooth as silk. No failure with Putnam's, 25c everywhere.

Why He Stopped

"I thought Meala had taken up golf. He doesn't seem to be playing now." "Yes, he started; but he has given it up. He lost his ball."

Many children die from the assaults of worms, and the first care of mothers should be to see that their infants are free from these pests. A vermicide can be depended on in Miller's Worm Powders. They will not only expel worms from the system, but act as a health-giving medicine and a remedy for many of the ailments that beset children, embolizing them and endangering their lives.

"Mamma, do angle larks wings?" "Certainly." "Then why did they want a ladder to get down to Jacob?"

Conquers Asthma. To be relieved from the terrible suffocating due to asthma is a great thing, but to be safeguarded for the future is even greater. Not only does Dr. J. D. Kellogg's Asthma Remedy bring prompt relief, but it introduces a new era of life for the afflicted. Systematic inhaling of smoke or fumes from the remedy prevents recurrences and often effects a permanent cure.

Pay As You Go

A negro minister discovered two of his parishioners playing cards on a Sunday—and for money.

"Rastus," said the minister, "don't you know it's wrong to play cards on de Sabbath?"

"Yeh, pastor," answered Rastus ruefully. "But believe me, ah's payin' foh mah sins."—Savannah News.

Excellent Christmas Service To The Old Country

The Canadian Pacific have made available a fleet of superb steamships and an unusual number of sailings for Christmas travel to the Old Country. In connection with these sailings special tourist sleepers are being operated from Edmonton, Saskatoon, Calgary, Moose Jaw, Regina and Winnipeg, direct to the ship's side at West St. John, thus giving a thorough service with the only change or transfer being from train to steamer.

The December sailings for which these cars will be operated are: S.S. "Montclair," December 7th, to Liverpool; S.S. "Melita," December 13th, to Southampton; S.S. "Montclair," December 14th, to Liverpool; and S.S. "Marloch," December 15th, to Glasgow.

In addition to the through tourist sleepers, a special train will also be operated for the sailing of the S.S. "Montclair," December 14th. This train will leave Winnipeg 9:50 a.m. Tuesday, December 11th. Special cars from western points will be attached to this train for operation through.

Booking should be arranged early in order to secure the best accommodation, and any Canadian Pacific Agent can make full arrangements. 32-23

An Oil that is Prized Everywhere—Dr. Thomas' Eucalypti Oil was put upon the market without any flourish over fifty years ago. It was put up to meet the wants of a small section, but as soon as its merits became known it has now become a household name. It is now known and prized throughout the continent. There is nothing equal to it.

No Risk

Rastus and Mose were having a heated argument. In reply to some remark of Rastus, Mose said—

"Cuzes, I know, nigh! Don't you think I've got any brains?"

"Huh!" Rastus replied. "Nighah, I brains were dynamite you couldn't blow off your hat!"

Minard's Liniment Relieves Pain.

"The parson had been preaching for an hour. 'I looked up at the mountains,' he declared, 'and I thought, beautiful as you are, you'll be destroyed while my soul will not.' I gazed upon the ocean and cried, 'Mighty as you are, you will eventually dry up but I will not.'"

Wretchedness OF Constipation Can Be Quickly Overcome by CARTER'S LITTLE LIVER PILLS

Purely vegetable—act sure and gently on the liver. Relieve biliousness, headache, indigestion. They do their duty. Small Pills—Small Dose—Small Price

Dollars in China Chinese finance is the most complicated in the world. We can well believe it when a St. Catharines traveler writes home that the Chinese have in circulation some 24 different species of dollars, each with a different value and that value changing from day to day.—St. Catharines Standard.

DANCE! Comet Schoolhouse, FRIDAY, OCT. 9. BARTH'S ORCHESTRA. EVERYBODY WELCOME! Ladies, Please Bring Baskets.

Here and There

The world's record for grain trains was shattered by the Canadian Pacific Railway on October 1st, with a monster train of 126 car loads of wheat, over a mile long, which operated between Stouffville and Aurora. The contents of the cars, 150,000 bushels, weighed 5,500 tons.

All grain loading records in Alberta were completely smashed by the Canadian Pacific on October 1st, when the Company loaded 753 cars, representing at least 1,000,000 bushels. If these cars were placed together they would make up a freight train about six miles in length, and a baker's dozen of these trains would extend from Calgary to Banff, a distance of 82 miles.

A record in western railroad construction was established on the Canadian Pacific Lanigan-Melfort line recently, when the last mile of track between Lanigan and Pleasantdale was completed in one day. D. A. Livingstone, engineer in charge, reports that seventy per cent of the crew of 25 were British harvesters.

Federal and Provincial Departments of Agriculture co-operated in the purchase in the British Isles of a large stock of horses, swine and sheep, including sheep owned by H. Majesty the King, which arrived here recently. This is the second shipment of cattle to Canada through the co-operation of the agricultural departments with sheep and swine breeders throughout the Dominion.

T. K. Doherty, the Canadian Commissioner in the International Institute of Agriculture, estimates Canada's exportable wheat surplus this year at 500 million bushels, as against the loss from the United States, 110 from Argentina, 50 from Australia, and 15 from Russia. Canada, in fact, may be expected to supply nearly half the wheat exports of the whole world—3-4 out of 675 million bushels.

E. W. Beatty, K.C., President of the Canadian Pacific, speaking at important centres on his recent extensive tour, through the Canadian West, announced a state of optimism, declaring that the general improvement in Canadian business conditions rendered an accompanying growing pessimism entirely unjustifiable. Stressing the need for a "new, intensive immigration policy" by the government, he put forward as suggestions that the department of immigration and colonization should issue a general invitation through Great Britain, the United States and certain European countries, for settlers, and that greater advantage should be taken of the favorable policies towards immigration in Canada adopted by the governments of Great Britain and other countries.

Most extraordinary yields of grain are reported from the Provincial School of Agriculture at Alberta. On a one-acre patch 125 bushels of Marquis wheat were threshed, which being a record for this crop, exceeding the 82 bushel yield of Sanger Wheeler, which was previously considered unsurpassable. From an acre seeded on Oct. 20th, 205 bushels were threshed. Barley, singly, yielded exceptionally. On a field of 27 acres an average of 70 bushels to the acre was secured, whilst on another, 10 acres of a different variety a yield of 80 bushels to the acre was recorded.

Eighty per cent of Canada's national debt is owned by Canadians. Bank deposits in this country at the close of the last fiscal year, March 31st, 1928, totalled \$1,218,000,000, an increase in ten years of \$780,000,000. The year's trade records show Canada's foreign trade to be \$1,000,000,000, an increase of \$221,000,000 over last year, and Canada's exports to exceed her imports by \$107,000,000, forty-two per cent of these exports being finished products.

A conservative estimate of the amount of money spent in Quebec by tourists reaches \$2,385,747. From the beginning of May until the first of September, 16,000 motor-tourists had called for information at the offices of the Quebec Auto Club. Taking an average of four people to each car, this meant that at least 60,000 people had come to the city by automobiles. Of this number there were approximately 3,000 camping parties, or 12,000 people.

At the Chateau Frontenac, Quebec, recently, Colonel J. S. Dennis, Chief Commissioner of Colonization of the Canadian Pacific Railway, outlined in a detailed speech existing conditions in Canada and prospects for the future. He emphatically stated that there was no cause for discouragement, but, on the contrary, every prospect of a career of rapid development, including an increase in population and the development of natural resources in such a way as to insure, in the comparatively near future, the abundance of food, of the woods, and progressing rapidly to a large population and favorable business and financial conditions.
